

# CAWLEY MODEL 800

## Manufacturer's Comment

Every element of design and every function of the Cawley Model 800 have been executed with care and precision.

Some of the more outstanding features of the Cawley 800 are ● Large front doors to allow an unobstructed view of the fire. (firescreen is included). ● Loading doors on both sides. ● Adjustable door latches to compensate for gasket compression. ● Double draft controls to allow the fire to be burned from either the right or left hand sides. ● Numbered draft controls that insure accurate and repeatable settings. ● An optional outside air intake collar. ● Preheated draft (see diagram above)—greatly increases combustion efficiency. ● Double wall back plate for reduced clearances to combustibles. ● “V” shaped firebrick lined firebox for the safer loading of more wood and the concentration of coals for more complete burning. (fully baffled to direct the flame both around the front and top of the stove for higher heat transmission.) ● Removable draft distribution plates to facilitate easy cleaning of ash. ● Large sweep shelf in the front that safely

catches any ashes or coals released while tending the fire. ● Machined cook lids webbed on the bottom for higher heat transmission. ● Adjustable feet for convenient leveling on uneven surfaces.

Additionally, the Cawley 800 is cast of iron specifically formulated for its excellent structural integrity and thermal characteristics. All of the parts that undergo high heat loading are designed using deeply rounded forms to increase strength and reduce the chance of warpage; sealed tongue-and-groove interlock construction insures controlled efficient overnight burns.

The 465 lbs. weight of the Cawley 800 insures that it will have the strength to easily withstand the strain of many years of burning cycles.

The deep bas reliefs of American wildlife decorating the 800 are designed and executed by wildlife artist, Martha Cawley. This is an unmatched contemporary example of an art form as old as the craft of fine iron casting itself.

All of our stoves have been successfully tested by Arnold Greene Testing Laboratories, Inc. to UL 1482 or UL 737. All carry a 10 year warranty.

The Cawley 800 may be seen and purchased at an authorized dealer near you. Please circle the reader service card for the dealer nearest you or send for our complete information packet. Please enclose \$1.00 to cover postage and handling.

## Specifications

*Height:* 26 in.; *Height To Center of Flue Collar:* 22 in. (in horizontal position); *Width:* 27 in. (overall); *Depth:* 20 in. (front to back, excluding flue collar and sweep shelf); *Depth:* 33 in. (overall); *Weight:* 485 lbs.; *Log Length Capacity:* 24 in. (max.); *Front Door Opening:* 19 x 10 in.; *Side Door Openings:* 10 x 10 in.; *Cooking Surface:* 16½ x 22 in.; *Flue Size:* 8 in.; *Draft Collar:* 4 in. (optional); *Heating Range:* 10,000—12,000 cu. ft.; *Suggested Retail Price:* Contact manufacturer for current prices.
