

KICKAPOO Home Furnace Model D-5X BBR

Manufacturer's Comment

The large, 5 cubic foot airtight firebox of the Kickapoo Home Furnace will hold approximately 130 lbs. of hardwood, which will burn 8 to 14 hours or more unattended; or it will hold 80 lbs. of coal, which can provide heat for up to 15 hours without reloading.

The galvanized sheet metal shroud of this furnace allows installation with its own hot air plenum or, it may be ducted into the plenums of an existing forced air furnace.

Based on the patented BBR design, our Home Furnace model includes the following quality features: a refractory firepot cradled in steel and welded into place providing greater combustion efficiency and durability; $\frac{3}{16}$ " welded steel firebox and cast iron doors and door frames that resist warpage and false drafts; a gasketed loading door that further insures airtightness; cast iron shaker grate and pre-heating secondary draft manifold to allow air to flow directly into the combustion area, making it extremely simple to start and maintain a fire; separate ash compartment and ash pan to allow ash removal at any time.

A thermostat in the shroud automatically operates the blower as heat is available for distribution. Heat output is controlled by the standard manual draft, or by the optional automatic electric draft control, operated by a Honeywell room thermostat.

The optional D-5 BP package includes a Dayton $\frac{1}{4}$ hp motor to power a quiet and durable 1075 CFM blower. Also included is a sheet metal cold air plenum/blower housing/filter cabinet that attaches to the rear of the furnace, facilitating connection of a filtered return air supply essential to good heat distribution.

This model, with the optional D-5 BP package, has been tested to meet or exceed UL standards and ICBO requirements.

The Kickapoo Home Furnace Model D-5X BBR can be used to supplement your present heating system. However, its efficiency and economy will encourage you to rely on your Kickapoo as the primary source of central heat, with your existing furnace supplementing it.

Kickapoo also makes smaller and larger furnaces, furnace add-ons and stoves. Write or call for a free catalog. Dealer inquiries invited.

Specifications

Height:	35 $\frac{1}{4}$ in.
Width:	26 in. at widest point
Depth:	30 in. (46 in. w/ D-5 BP Package)
Flue Height (top):	38 $\frac{1}{4}$ in.
Flue Size:	6 in. I.D.
Log Length Cap.:	24 in.
Door Opening:	8 $\frac{5}{8}$ in. x 11 $\frac{5}{8}$ in. x 11 $\frac{5}{8}$ in. x 11 $\frac{5}{8}$ in.
Materials:	Steel, cast iron, refractory, sheet metal
Recom. Fuels:	Dry hardwood or coal
Weight:	400 lbs. (450 lbs. w/ D-5 BP Package)
Suggested Retail:	\$744.00 (\$944.00 w/ D-5 BP Package) F.O.B. La Farge, Wisconsin
