

# OLD MILL® 80 Coal & Woodburning Stove

## Manufacturer's Comment

The Old Mill® 80 coal stove with woodburning capabilities was designed for the purpose of burning coal primarily, with ability to burn wood very well. The Old Mill coal stove is large enough to supplement existing heating systems or heat entire homes.

All of the reliable and positive features of our other stoves have been utilized in this stove to insure safe and proper operation. Just as in the other fine Old Mill stoves, nothing has been left out. The O.M. 80 is firebrick lined, has a baffle system to retain heat and reburn gases, a large front ashtray to catch any fallen ash and a tapered latch and rope seal in each door that assures positive locking and efficient operation.

A cast iron side door with cast iron vent control regulates the burning of the coal. A cast iron basket and shaker grate is surrounded by firebrick on the sides and back. The Old Mill 80 coal stove holds approximately 60 lbs. of coal or can be filled with hardwood 16 inches long. In the wood operation mode the double front doors can be opened to view the fire, creating a cozy relaxed atmosphere.

The traditional Old Mill scene will be noticed on the front of the double cast iron doors.

The O.M. 80 can help you achieve independence from high spiraling fuel costs. Family unity and stronger ties will be welcomed back for every family member can be given chores to help replenish and maintain this very fine stove. The warmth generated and family cheerfulness will far outweigh the attention it will demand of you.

The O.M. 80 carries a 5 Year Limited Warranty and has been tested and listed by Arnold Greene Testing Laboratories to UL-1482 Standards and ANSI-UL-737. It is also available with the optional blower top. Other options such as: fireplace screen (to be used only when burning wood), chrome polished hinge pins, spring handles, chrome highlighted double doors and vent controls with black background are also available.
