Energex Hardwood Pellets **SOLD OUT**

Manufactured out of Mifflintown, PA, these premium hardwood pellets are made of the finest blend of hardwoods that provide an ash content well below the industry standard of 1%. With the listed BTUs, these hardwood pellets can put out a lot of heat with low ash at a great low price. 8500 BTU's per pound.

Energex Blend **SOLD OUT**

Manufactured out of Lac-Mégantic, Quebec, the premium blend is truly the best of both worlds. The blend is approximately 60% softwood and 40% hardwood which provides higher heat output and a lower ash content. This is one of the best premium grade pellets out there with an ash content between 0.5% and 0.7% 8700 BTU's per pound.

New England **SOLD OUT**

New England Wood Pellets are a high quality, PFI Certified premium grade pellet fuel made from a proprietary blend of hardwood and other wood species. Quality characteristics are as follows: Ash content between .4% and .6%, 8000 BTU's per pound. 80 % hardwood — 20 % softwood

Curran Blend **SOLD OUT**

Ton An ideal blend of northeast hard and softwoods to produce premium pellets that provide more BTU's per pound. These Premium Wood Pellets meet or exceed the PFI* Fuel Grade Requirements for Premium Grade pellets based on the following independent test results: Ash content less than 1%, 8200 BTU's per pound.

Curran Hardwood **SOLD OUT**

These hardwood pellets will give you a long burning fire sure to satisfy your heating needs. These 100% Hardwood Premium Pellets meet or exceed the PFI* Fuel Grade Requirements for Premium Grade pellets based on the following independent test results: Ash content less than 1%, 8000 BTU's per pound.

Barefoot Wood Pellets **\$299 Ton**

Barefoot is a superior low ash pellet. These pellets are manufactured from clean sawdust and other clean lumber materials from cabinets, hardwood flooring, etc. from woods such as cherry, maple, white/red oak & walnut. This pellet is smaller in diameter and offers high BTUs. The Barefoot facilities are located in Troy, Pa. They are consistent from batch to batch and has very few fines.

Individual bag price: \$6.50

Hamer Hot Ones **SOLD OUT**

Hamers Hot Ones pellet fuel is made from clean sawdust, much of which comes from their own lumber operations in the heart of the Appalachian Region of the United States in West Virginia. The dust is compressed into pellets that produce clean, reliable heat with low emissions and an extremely small amount of ash. Hamers Hot Ones is the oldest residential pellet manufacturer in the Eastern United States.

Dry Creek Wood Pellets **\$279 Ton**

Dry Creek Premium Wood Pellets are one of the highest performing wood pellet fuels available today. All Dry Creek brand pellets are made from choice hardwood and are tested regularly to ensure quality, superior performance.

Individual bag price: \$6.25

La Crete Wood Pellets **\$312.50 Ton**

La Crete Sawmills Ltd. pellet fuel is made from clean, dry wood fiber from their own lumber operations and neighboring sawmills. Only the finest material is used and dried to the lowest moisture possible before being used in the pelletizing process. No additives are used, only the natural resins and binders hold the pellets together. Made from 100% Spruce softwood. Only .5% Ash.

Individual bag price: \$6.25

Cubex Wood Pellets **SOLD OUT**

Cubex is from a Canadian company called Lauzon, one of the top floor manufacturers. Cubex is 100% hardwood that is manufactured from hardwood flooring. This pellet is of premium grade with less than .4% ash and is 1/4" to 1" in length. Greater than 9000 BTUs.

Bio Bricks Firewood \$299 Ton

A ton of BioBricks, when burned, will give as much heat as a cord of seasoned firewood. BioBricks are free of the dust, dirt, bugs, vermin, and the mess that is commonly associated with burning cordwood. BioBricks from BioPellet, LLC, turn your wood stove into something as easy to use as a pellet stove, but you don't need electricity to run it!

Individual sleeve price: \$7.00

Envi 8's Firewood \$299 Ton

Our Envi-8 Block measures approximately 3 1/4" x 2 3/4" x 9 1/2" with an average weight between 3 and 4 pounds. Envi Blocks are made from a naturally renewable resource, is carbon neutral, reduces pollution and our dependence on fossil fuels as well as utilizes wood waste to prevent additional harvesting of trees.

Individual sleeve price: \$3.50

Envi Blocks Firewood \$299 Ton

These blocks are an all wood product with no additives which are specifically designed to be used as firewood in wood stoves, fireplaces, fire pits and wood furnaces. Each original Envi Block will be approximately 4" x 4" x 10 1/2" weighing 6 to 7 pounds each.

Individual sleeve price: \$3.50

Reading Coal **\$274 Ton**

Supplying domestic and international markets for over 135 years, the Reading Anthracite Company is a leader in Pennsylvania's anthracite coal industry. For home or small business use, coal stoves provide an economical heating alternative as a main or supplemental heat source.

Individual bag price: \$6.50

Blaschak Coal **\$295 Ton**

It's convenient. It's cost-effective. It's clean. And if you're considering anthracite – Blaschak is best! Anthracite is one of nature's cleanest-burning solid fossil fuels and carbon sources. A specialty mineral, anthracite is cleaner and harder than other forms of coal and offers the highest heat value of all coals.

Individual bag price: \$7.00
