

Instructions for Woodstove

I'm  cold!

"Active"??

Yes

"Inactive"

Cold Start

Turn Temp knob to HIGH:

LOW(thin line)

MED(middle of line)

HIGH(wide line)

I'm still cold!

Temp knob

Turn ON
FAN
SWITCH

Rest of house cold?

Turn on furnace fan in hallway

Order of instructions very important

1. Turn off catalyst:

2. Turn Temp Knob to HIGH

3. Turn FAN switch OFF

4. Rake any hot coals to front

5. Add kindling, newspaper, fire starters (in black bucket)

6. Add wood

7. Leave door unlatched until fire catches (do not leave fire unattended at this stage—risk chimney fire!)

8. Latch door

9. Wait until TEMP "ACTIVE"

To Add more WOOD:

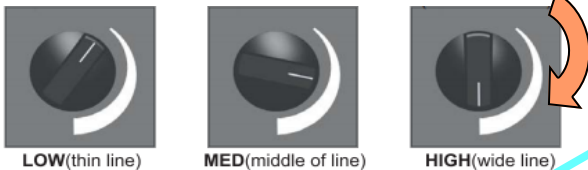

1. First make sure TEMP is in the "ACTIVE" ZONE

2. Turn Catalyst OFF:

3. Turn Temp knob to HIGH

4. Turn FAN switch OFF

5. Wait 30 seconds

6. Open door, rake coals to front

7. ADD WOOD

8. Close door

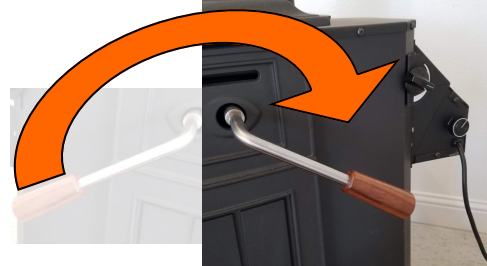

9. Wait 2 min. Check TEMP

10. IF TEMP still "ACTIVE" then go to Step #10 of "Cold Start"

Cold Start con't:

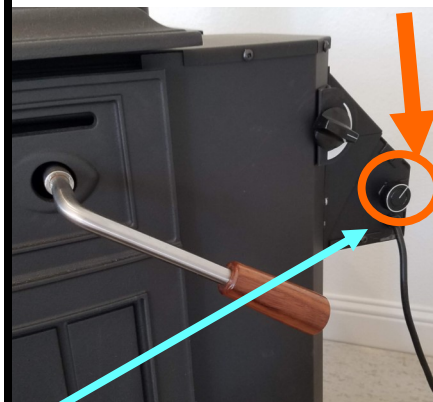

10. Turn Catalyst back on:

11. Push catalyst again firmly (make sure all the way back)

12. Turn on fan (if desired)

Turn ON
FAN
SWITCH

13. Wait 10-20 minutes then turn TEMP to desired setting:

Please do NOT empty out ashes or clean chimney
