

April 18, 2023

Dear Intertek Hearth Customer:

This letter is to inform you that Intertek Testing Services NA, Inc. (Intertek) will discontinue EPA Emissions testing to the NSPS regulation for Warm Air Furnaces and Wood Boiler type products effective immediately at our Middleton, WI laboratory. There are other ISO 17025 accredited laboratories that offer this testing, so please work with these agencies moving forward.

Intertek will still maintain your certification listings for these product types and will accept new testing data from other accredited testing laboratories. You may also submit test data for new models to be added to your existing listings.

This notice does not affect the current testing services provided for Pellet and Wood Stoves. We will continue to support existing EPA and Safety certification listings as needed.

In case of any further questions, please do not hesitate to contact me via telephone +1 608-824-7444 or email brian.brunson@intertek.com

Yours sincerely,

Brian Brunson
