

FIREPLACE INSERT

AMERICAN ★ **MODEL - I-100**
★ **EAGLE STOVES**

... Convert your masonry fireplace into an energy saving, heat producing efficient unit.

... The AMERICAN EAGLE insert is designed with sturdy double wall construction on three sides and top, providing you with the highest efficiency of any insert on the market today.

... Model I - 100, is equipped with a 148 CFM blower, regulated by a solid state infinite speed air control, thus maximizing efficiency by circulating radiant heat in the heat chamber. This provides a more even heat distribution throughout your home. Our unique design forces hot air towards the floor unlike other makes. Normal air convection works when the blower is not in use.
