INSTALLATION INSTRUCTIONS AND PARTS LIST

GENERAL: Remove all parts and check to be sure they are there. Report to your dealer if any parts are missing or damaged.

ONE CARTON CONTAINING: Fireplace and chimney spacer AND any other cartons you have ordered to complete your chimney installation.

LOCAL CODES: Local building Codes should be consulted in ALL cases as to the particular requirements concerned with the installation of FACTORY BUILT FIREPLACES.

IMPORTANT

Chimney spacer MUST BE ATTACHED TO FIREPLACE.
This will provide a minimum required clearance to combustible materials from the chimney to the joist area above fireplace.

To install place chimney spacer over top spacers on fireplace flush with rear of fireplace.

Align holes and attach with two screws on each side. Always provide a source of fresh air into the room where the fireplace is installed. Failure to do so may result in air starvation of other fuel burning appliances and the possible development of hazardous conditions.
